DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2 and 4-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Therssen et al (hereafter Therssen) (EP000512606B1).

Regarding claims 1 and 2, Therssen discloses a method for a receiver (Fig. 1) having a signal path incorporating a tuner (T), a frequency demodulator circuit (FD) for supplying an analog stereo multiplex signal comprising a baseband stereo sum signal, a 19 kHz stereo pilot and a stereo difference signal, which is double sideband amplitude-modulated on a suppressed 38 kHz subcarrier (see Fig. 3), a sampler (A/D) for converting the analog stereo multiplex signal into a time discrete digital stereo multiplex signal and a stereo decoder (SD) for decoding the time discrete digital stereo multiplex signal into a time-discrete digital stereo sum and a time discrete digital stereo difference signal, characterized in that the analog stereo multiplex signal is converted into a time discrete digital stereo multiplex signal and then the time discrete digital stereo multiplex signal is shifted over a frequency of 19 kHz (by QMF) and then further shifted with 19 kHz (by M2 and LP2, so the sum and difference can be dematrixed to form the left and right signals).

Regarding claims 4 and 8, Therssen shows the second low pass filter (IC).

Regarding claims 5, 9 and 10, Therssen shows the two serial (in series with the signal from QMF) frequency shifting circuits (M1, M2).

Regarding claim 6, Therssen shows the low pass filter (LP 2).

Regarding claim 7, Therssen shows the complex filter (M2 and LP2).

Allowable Subject Matter

3. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ping Lee whose telephone number is 571-272-7522.
